Introduction

Steve Cassulo - District Manager

Stipulated Order and Modified Order (Background)

- During July, August, and September 2020, Chiquita received NOVs from the South Coast Air Quality Management District (SCAQMD).
- SCAQMD and Chiquita worked together to reach an agreement on how to address potential odors in the form of a Stipulated Order for Abatement.
- The Stipulated Order was modified to incorporate recommendations from consultants that Chiquita hired to assess landfill operations.
- Since the March AQMD hearing, Chiquita has been working with the consultants to implement their recommendations for improving landfill operations.

Community Outreach

- Hosting these community meetings once per month
- Created and are maintaining a dedicated section of our website for information related to the modified Stipulated Order
 - Meeting materials are posted to the website

Community Odor Surveillance

- **Condition 1(b)** – Chiquita must conduct community odor surveillance twice daily.
- **Condition 1(g)** – Chiquita logs the results of these odor surveillances.
 - These monthly logs are posted on Chiquita's website.

Working Face and Disposal Locations

- The modified Stipulated Order requires a reduction in the size of the working face and dictates the size of the working face and working face locations based on wind data and odor surveillance data.
- This requirement will be replaced by new Standard Operating Procedures (SOPs) pursuant to Condition 25 of the modified Stipulated Order.
 - Draft SOPs were submitted to SCAQMD on May 10. SCAQMD provided comments on May 26. Revised drafts are due to SCAQMD on June 18.

Standard Operating Procedures (SOPs)

- Odorous loads – detection, prohibition, diversion, and recordkeeping
- Cell development at OC Zone and Cell 6

Odor Control Supervisor

- Developed Standard Operating Procedures (SOPs) (with consultant assistance)
- Profiled odorous loads (OLPs) (with consultant assistance)
- Developed Key Performance Indicators (KPIs) (with consultant assistance) to assess progress
- SOPs, OLPs and KPIs were all submitted to SCAQMD and Chiquita is currently addressing SCAQMD comments.
- Will implement once approved by SCAQMD

Consultants

- Maintain and improve landfill gas collection system
 - Monthly logs can be found on Chiquita's website
- Assess prevailing wind patterns in Cells 7 and 9-13
- Evaluate changes in wind dynamics from development of Cells 6 and 8
- Study air movement along western perimeter of landfill (near Cells 6 and 8), including assessment of feasibility of vegetative barrier or other air flow disruptor
